OBJECTIVE

Dedicated and motivated MCA fresher with a strong foundation in computer science, seeking opportunities to apply my knowledge and skills in a dynamic work environment. Eager to contribute effectively and learn in a professional setting. Proven ability to quickly adapt and learn new concepts.

SKILLS & ABILITIES

Programming Languages: C, C++, Java, Python

Database Management: MySQL, Oracle

Web Development: HTML, CSS, JavaScript

Version Control: Git, GitHub

Problem Solving, Communication Skills, Team Collaboration, Fast Learner

EDUCATION

October 2025 Master of Computer Applications (MCA)

Reva University

Pursuing.

September 2023 Bachelor of Computer Applications (BCA)

Seshadripuram first grade college Yelahanka-64

CGPA: 8.65%

March 2020 Pre-University (PU)

Vidhyanidhi Independent PU College, Doddaballapura

Percentage: 65.6%

April 2018 10th Standard (SSLC)

Sri Devaraj Urs Int. Resi. High School, Doddaballapura

Percentage: 80.00%

CERTIFICATIONS

Cisco Certified Support Technician – Cyber Security

- Defined essential security principles, including vulnerabilities, threats, exploits, and risks.
- Explained common threats and vulnerabilities like malware, ransomware, and social engineering attacks.
- Described TCP/IP protocol vulnerabilities, network addresses, and network infrastructure technologies.

Entrepreneurship I: Laying the Foundation

- Learned key entrepreneurship concepts like opportunity identification and market analysis.
- Gained skills in business planning, financial forecasting, and goal setting.
- Developed an entrepreneurial mindset with focus on problem-solving and risk management.

PROJECTS

Online Diagnostic Lab Management System (Final Semester BCA Project)

- Develop a web-based Diagnostic Lab Management System to streamline lab activities and overcome manual management challenges.
- Tailored for retail diagnostic labs with minimal customization needed during implementation.
- Manages daily transactions, customer and employee records, and various diagnostic activities.
- Enhances productivity, profitability, and reduces data loss risks by recording all transactions online.
- Ensures efficient lab operations, leading to improved service delivery and business performance.

Face Recognition Attendance in Social-media (5th Semester BCA Project)

- Develop a robust face recognition system for social media platforms to enhance user security and personalized experiences.
- Utilize advanced machine learning algorithms and neural networks for accurate real-time user identification and verification.
- Address privacy concerns by implementing secure data handling and storage protocols.
- Feature user-friendly interfaces for seamless integration into existing social media frameworks.
- Improve user interaction and safety across digital communities

STRENGTHS

- Quick Learner.
- Motivating People.
- Leadership.
- Skill minded.
- Good Team Player.
- Flexible to learn new things.
